

# 2nd Newsletter

Project code: 2022-1-BE01-KA220-ADU-000088255

Welcome to the 2nd edition of the CIVIC GREEN project's E-Newsletter! The CIVIC GREEN project, funded under the ERASMUS+ program, is promoting active citizenship while deepening the understanding of climate change and environmental challenges among European citizens and public institutions. This initiative aims to enhance civic and democratic participation by facilitating access to knowledge and creating platforms for direct engagement. The project will introduce a variety of activities, including online forums, public debates, and lobbying platforms. These avenues are designed to empower citizens from diverse backgrounds across Europe, enabling them to share, analyze, and assess the public commitment to environmental actions.

## News

### TRANSNATIONAL PROJECT MEETING IN Istanbul, Türkiye- OCTOBER 26, 2023

A recent milestone for the CivicGreen project was the partners' meeting held in Istanbul, where significant progress was made in shaping the educational and operational frameworks. Discussions focused on the development of a comprehensive competence framework for civic engagement and the contents of eight MOOCs structured around these competencies. Furthermore, the organization of Local Citizen Labs was a key topic, where each partner country will enroll ten citizens to test and validate the MOOCs.

### Looking Ahead: Next Steps in Klagenfurt

As the CivicGreen project continues to evolve, the next partners meeting is anticipated to occur in Klagenfurt, Austria, on May 8, 2024. This upcoming gathering will focus on reviewing the implementation progress of various project components, discussing dissemination strategies, and exploring measures to ensure the project's long-term impact and sustainability. The partners will also evaluate, refine and enhance the civic monitoring tools and the community of practice (CoP) developed under the project. An integral part of this meeting will be to assess the Evaluation & Quality Assurance processes to ensure that all project deliverables maintain the highest standards.
