CivicGreen Project Progresses Toward Conclusion with Key Milestones Achieved

As the CivicGreen project, supported by the ERASMUS+ program, moves toward its final stages, it continues to uphold its commitment to fostering active citizenship and addressing environmental challenges across Europe. The project's recent Third Transnational Project Meeting held on May 8, 2024, in Klagenfurt, Austria, was a pivotal event where partners reviewed the progress made and planned the final steps for delivering the project's outcomes.

Significant achievements have been made since the project's inception, with the CivicGreen initiative having successfully completed and uploaded the English version of the eight specially designed MOOCs to the platform, ready for widespread educational use. Additionally, the CitizenLab platform is now fully operational, facilitating interaction and engagement among citizens. These advancements set the stage for the validation process and the upcoming final meeting and multiplier events in all the partners countries, promising to enhance the project's long-term impact and sustainability.

Advancing Towards a Greener Tomorrow Through Civic Engagement

As the CivicGreen project nears its completion, its impact on promoting civic engagement and environmental sustainability in Europe is more evident than ever. The project's deliverables, particularly the eight innovative online MOOCs, are now fully operational and hosted on our advanced platform <https://civicgreen.erasmus.site/platform/>. It is designed to educate and empower citizens across various countries. The CitizenLab continues to facilitate vibrant discussions and interactions among community members, significantly

enhancing civic participation. Moreover, the piloting of the Community of Practice (CoP) and the Civic Monitoring Tool (CMT) has been instrumental in enabling stakeholders to share insights and track engagement effectively, further cementing the foundation for informed environmental decision-making. As part of our comprehensive dissemination strategy, over 200 adults from partner countries have been engaged, learning about the project outcomes and how to leverage these resources to foster a sustainable future. These efforts collectively enhance our mission to empower communities through knowledge and direct involvement, setting the stage for ongoing contributions to environmental sustainability.

Civic Green Progress

Upcoming Final Meeting in Athens, 17 September 2024 To Culminate CivicGreen's Achievements

The CivicGreen project is gearing up for its final Transnational Project Meeting, scheduled to take place in Athens, Greece, on 17 September 2024. This partners' gathering will serve as a crucial moment to evaluate all activities conducted over the course of the project, including the outcomes of the final events and the national valorization forums. These forums are set to engage a diverse audience, targeting a minimum of 25 participants from each partner country, encompassing not only the project's direct target groups but also associated partners and relevant stakeholders.

This assembly will highlight the comprehensive impact of the CivicGreen project, reviewing the successful implementation of its initiatives and the broad-scale dissemination of its results. It will also be an opportunity to reflect on the project's overarching goals, ensuring that the insights gained and the tools developed reach the widest possible audience, thereby maximizing the project's sustainability and long-term impact.
